

WORKSTREAM 2 - Knowledge Assistant (master + domain agents)

WORKSTREAM 1 - AI Voice Handling

Governance

Change approval ladder

Task 1: CONTENT
Example change: Practice hours, parking info, phoning bank
Approval: Single named content owner (no engineering)
Turnaround: 1 hour
Gate: Owner - direct edit
Task 2: CONVERSATIONAL FLOW
Example change: New trigger phrase, rewording a script step
Approval: Product/CT owner + read code pass
Turnaround: 24 hours
Gate: Success evaluation criteria must pass
Task 3: SENSIBILITY / SAFETY SCRIPT
Example change: Emergency escalation wording, consent prompts, refusal language
Approval: Clinical/Training officer + clinical sign-off + full audit
Turnaround: Weekly release window (predefined path for urgent safety fixes)
Gate: Full traceable conversation test suite + administrative team pass
Task 4: NEW TOOLS / WRITE ACTION
Example change: New capability handling R4; Dataphiles; Multiagent
Approval: Threat model + security review + performance sign-off
Turnaround: Monthly release only, not ad hoc
Gate: Threat model documentation + security review + staged rollout

Soft-lock (slot reservation) design
